Summary

Computer Science undergraduate (CGPA: 9.53/10.0) with hands-on experience in full-stack development, machine learning, and data-driven applications. Proficient in Python, FastAPI, React, and Scikit-learn, with a track record of building and deploying end-to-end projects. Strong foundation in DSA, OOP, and software engineering principles, with a focus on scalable, real-world problem solving.

Education

ITM SLS Baroda University

B.Tech in Computer Science Engineering

CGPA: 9.53/10.0

Vadodara, Gujarat

January 2027

- Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Technologies, Software Engineering

Internship Experience

VNC Global

AI Automation Intern → Full-Stack Development Intern

Vadodara, Gujarat

July 2026 – Present

- Began the internship focused on AI automation workflows, later transitioning into full-stack development based on team needs
- Currently building and maintaining full-stack features using React, Node.js, and pnpm-based project workflows
- Collaborate with the development team to design, implement, and test end-to-end functionality across the stack
- Applying strong DSA and software engineering fundamentals to write clean, maintainable, production-ready code

Projects

Automated Exoplanet Hunter [Live Demo](#)

Oct 2025

NASA Space Apps Challenge 2025

- Built a full-stack app (FastAPI backend, React/TypeScript frontend) using NASA Kepler/TESS data to speed up exoplanet vetting
- Achieved 99.9% recall with a CPU-efficient Gradient Boosting Classifier and added feature importance scoring for transparent AI decisions
- Enabled real-time batch CSV processing and confidence scoring, cutting vetting time from weeks to milliseconds

AutoVest – AI-Powered Micro-Investment Assistant [Live Demo](#)

Dec 2025

- Built a full-stack app that turns everyday spending into intelligent wealth building via an AI Financial Health Score (0–100)
- Implemented Smart Subscription Leak Detection and an Adaptive Investment Engine that adjusts strategy based on real-time financial health
- Enabled automatic spare-change investing by rounding up transactions for effortless micro-investments

Achievements

- **Designathon 2026 – Top 5**, ITM SLS Baroda University (Feb 2026): Ranked Top 5 of 50 teams in an 8-hour design hackathon, rapidly prototyping under tight deadlines
- **Game Jam Participant**, ITM SLS Baroda University (Feb 2025): Designed and built a 2D Unity game with a team in a time-constrained environment
- **Code Clash Participant**, ITM SLS Baroda University (Feb 2025): Solved algorithmic problems in Arrays, Strings, and Dynamic Programming in a competitive coding environment

Skills

Languages: Python, JavaScript, TypeScript, C++, Java, C, SQL

Frameworks & Runtimes: React, Node.js, FastAPI, ASP.NET, Laravel, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib

Databases & Backend: MySQL, Supabase

Tools & DevOps: Git, GitHub, Docker, pnpm, Figma

Concepts: Machine Learning, Data Structures & Algorithms, OOP, DBMS, Software Engineering
