Summary

Computer Science undergraduate (CGPA: 9.43/10.0) with hands-on experience in full-stack development, machine learning, and data-driven applications. Proficient in Python, FastAPI, React, and Scikit-learn, with a track record of building and deploying end-to-end projects. Strong foundation in DSA, OOP, and software engineering principles, with a focus on scalable, real-world problem solving.

Education

ITM SLS Baroda University

B.Tech in Computer Science Engineering

CGPA: 9.43/10.0

Vadodara, Gujarat

January 2027

- Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Web Technologies, Software Engineering

Projects

Automated Exoplanet Hunter [Live Demo](#)

Oct 2025

NASA Space Apps Challenge 2025

- Used data from NASA's Kepler and TESS missions to build a full-stack application (FastAPI backend, React/TypeScript frontend) that speeds up the process of vetting exoplanets
- Achieved 99.9% recall using a CPU-efficient Gradient Boosting Classifier, ensuring almost all planets were identified
- Applied feature importance scoring to make AI decisions transparent and trustworthy for astronomers
- Enabled real-time feedback on batch CSV processing, contamination flagging, and confidence scoring
- Reduced vetting time from weeks of manual review to milliseconds of AI prediction

AutoVest – AI-Powered Micro-Investment Assistant [Live Demo](#)

Dec 2025

- Built a full-stack web application that transforms everyday spending into intelligent wealth building
- Created an AI Financial Health Score (0–100) analyzing spending stability, emergency funds, and reserves in real time
- Implemented Smart Subscription Leak Detection to identify unused subscriptions and calculate monthly savings potential
- Developed an Adaptive Investment Engine that adjusts strategies from conservative to aggressive based on real-time financial health
- Enabled automatic spare-change investing by rounding up transactions for effortless micro-investments

Achievements

Designathon 2026 – Top 5

Feb 2026

ITM SLS Baroda University

- Ranked Top 5 out of 50 teams in an 8-hour design hackathon
- Collaborated in a fast-paced team environment to rapidly prototype innovative solutions
- Demonstrated creative problem-solving and user-centered design thinking under tight deadlines

Game Jam Participant

Feb 2025

ITM SLS Baroda University

- Designed and developed a 2D game using Unity within a tight time-constrained environment
- Collaborated with teammates to ideate, prototype, and deliver a fully playable game concept from scratch
- Strengthened skills in game mechanics, scene design, and rapid iterative development under pressure

Code Clash Participant

Feb 2025

ITM SLS Baroda University

- Tackled algorithmic problems spanning Arrays, Strings, and Dynamic Programming in a competitive coding environment
- Applied structured problem-solving approaches to break down and optimize solutions under time constraints
- Gained hands-on exposure to competitive programming and strengthened core DSA fundamentals

Skills

Python, JavaScript, C++, Java, C, FastAPI, React, TypeScript, ASP.NET, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, MySQL, SQL, Git, GitHub, Figma, Laravel, Machine Learning, Data Structures & Algorithms, OOP, DBMS, Software Engineering
